

3D MOTION GOLF

**The Advanced 3D Data Capture System for
Golf Swing Analysis, Instruction and Club Fitting**

**The 'must-have' experience for every golfer
It's like an MRI for your golf swing!**

3D MOTION GOLF

3D Motion Golf is the most advanced training system for golf swing analysis, instruction, club fitting and fitness training available today - for everyone from beginners to tour professionals.

The golf performance measurement system enables golf professionals, club shops, sporting goods stores and researchers to precisely and instantly track their body, club and ball motion in full 3D for swing analysis and custom fittings.

The motion capture process is simple and non-invasive, as the system is totally optical and tetherless. Small reflective markers are placed on the subject and the system instantly renders a 3D graphics character.

Because the technology displays the subject's image in real-time, an athlete may actually "step into" any of the many tour professional swings stored on our database. The student then replicates the motions of the model enabling him or her to "feel" the exact mechanics required to successfully perform the movement. The feedback is intense and helps everyone learn much more quickly.

Your business or club can be known for having the best game improvement technology available today!

3D MOTION GOLF

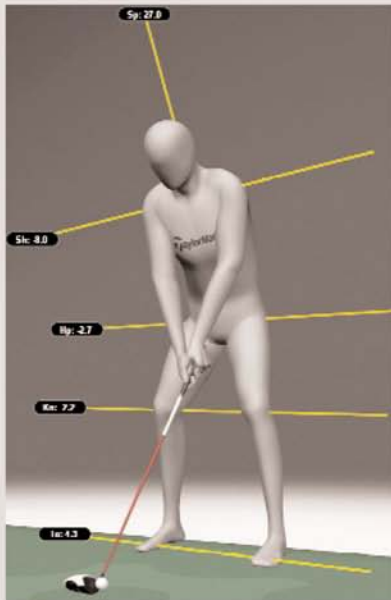

the 'must-have' experience for every golfer..
it's like an MRI for your golf swing!

The 3D Motion Golf system offers -

-  Advanced 3D Data Capture to create real-time video
-  Golfers can view any type of swing from every angle
-  Learn to move in the most productive way for golf
-  Helps prevent injury and back pain
-  Helps gain strength and flexibility
-  Learn to hit the ball farther and straighter
-  A full training and club fitting system

3D Motion Golf offers two great system options

-  full training and basic club fitting
-  full training and full club fitting

Motion Golf lessons and a full club fitting service

Motion Golf Instruction

Comprehensive Swing Analysis

IT TEACHES "FEEL" - With this system a golfer can step into a tour professional's swing.. to do and know. It provides powerful, effective, and immediate feedback that sticks. Teachers are unanimous in that it creates faster improvements in swing performance than conventional approaches, with estimates of 4 to 9 times faster.

Detailed Swing Data

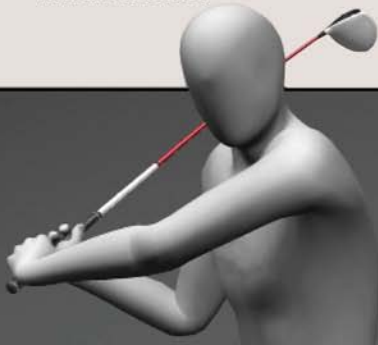

IT'S DEAD-ON ACCURATE - The 3D motion of the body and club, and all the underlying performance data are accurately analysed with incredible engineering precision, even down to club head speed, bending of the shaft and precise club head positions during the swing and at impact, which means it provides validation for coaching suggestions that lead to "Oh, I see."

"Step Into" a Pro's Swing

IT TEACHES FEEL - The player's swing can be compared to the swing of an expert as a model for teaching or compare to the player's previously captured 3D swing motion. In addition, the player can "step into" a live virtual reality world and feel the tour player's swing.

The Putting Stroke

IT TEACHES PUTTING - The system has the unique capability to perform a detailed evaluation of a player's putting stroke, in addition to all the swing characteristics of irons and woods like weight transfer, swing planes, cocking angle, speed planes, and the x-factor.

Become a Motion Golf Partner and become part of the best and join us in building "the future of golf instruction"

If you are a private golf club, golf academy, driving range, retail store or custom club fitter, you could become a **Motion Golf Partner** and enjoy the prestige of having the best game improvement technology available today. This drives improved business image, greater employee morale, increased volume and greater profits.

Motion Golf has a number of programs for people committed to excellence in the golf industry. When a business adds a Motion Golf Imaging (MGI) System, they instantly become the most sophisticated golf improvement facility in their area. Organisations who have joined us have found they dramatically improve their image, business volume and profit with the MGI System.

Our partner programs are low risk to your business and are designed to help partners acquire the MGI System and instantly become the most sophisticated golf improvement business in their area.

The Motion Golf system is available to buy or lease to the trade. For more information or to arrange a demonstration of the Motion Golf system, call our team on 01844 239700 or email us at sales@3dmotiongolf.co.uk
